Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by EverQuest PC online role-playing game.

As concerns claim 17, a program information supply method in supplying programs consisting of information registered in program information files transmitted from a server to each user's computer program execution system and information held in said computer program execution system, said method comprising: producing object data multiple characters (multiple game characters created by game engine) to be displayed on a monitor (user's monitor) of said computer program execution system; producing movement data (game engine updates position data for the characters to provide movement in the game) for each sequence of said multiple characters that appear in the multiple sequences that constitute said program; and recording on a recording medium (CD-ROM, hard drive of user's PC) distributed to each user said object data of said multiple characters and movement data for each sequence (data stored on CD-ROM or hard drive).

As concerns claim 18, a program information supply method according to claim 17, further comprising producing multiple background images (game has background images which are displayed during the game) to be displayed in said multiple sequences, and recording on said

Art Unit: 2151

recording medium background images (CD-ROM or hard drive, will contain multiple files for background images) selected from the produced multiple background images.

As concerns claim 19, a program information editing method, in editing a program consisting of information registered in program information files transmitted from a server (game server) to each users computer program execution system and information held in said computer program execution system, said method comprising: determining a combination of multiple sequences that constitute said program and registering information on the sequences relating to said combination in a program information file (state of the world information); selecting contributed texts (text sent via chat in game) sent from each user and extracting the contributed text to be announced in each sequence and; registering the extracted contributed texts in the information of the sequence that corresponds to said contributed texts among the information of the multiple sequences registered in said program information files (text received via chat which is part of state of world information which is changing/updating).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over EverQuest PC online role-playing game as applied to claim 19 above in view of U.S. Patent No. 6,332,143 to Chase.

EverQuest does not disclose flag information for the feeling that can be judged from text.

Art Unit: 2151

Chase '143 discloses determining and evaluating text for emotional connotations (abstract) and the information is flagged (column 4, lines 5-50, categories and ratings).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a system for analyzing text in order to raise the awareness of the emotional connotations of the text, enhancing the user's experience.

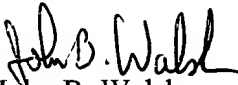

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
